

NINCO®

2013

www.ninco.com

NINCO es una compañía establecida en Barcelona desde 1993. Desde 2008 se transformó de famoso fabricante de slot a **proveedor integral de hobby**. Apostamos por la calidad en el diseño, I+D, fabricación, comunicación y comercialización de **coches, pistas y recambios de slot**, así como una amplia gama de **vehículos de radiocontrol que incluye helicópteros, coches, vehículos especiales, aviones y barcos**.

NINCO se ha convertido en uno de los principales proveedores de artículos de hobby tanto **para tiendas de hobby, como jugueterías y grandes superficies**.

- Tenemos experiencia en el mercado
- Tenemos el conocimiento del producto
- Desarrollamos marcas y catálogos consistentes
- Conectamos con el consumidor y las necesidades de los clientes

Somos un proveedor integral que ofrece gamas competitivas y equilibradas de artículos de hobby y juguete para los distribuidores del sector.

*NINCO is company established in Barcelona since 1993. Since 2008 transformed from slot-only **manufacturer to full hobby supplier**. Dedicated to design, R+D, manufacturing, marketing and distribution of **slot racing cars, tracks and spare parts** and a full range of **RC vehicles including helicopters, cars, heavy duties, planes and boats**.*

NINCO has become a main supplier for hobby products from retail shops to toy shops and department stores worldwide.

- We have experience in the market
- We have knowledge of the product
- We develop consistent brands and catalogues
- We understand the customer and retailer needs

We are a unique source to provide a competitive and balanced range of toy & hobby products to toy distributors.

Enjoy it...

DIGITAL

APP

COMPATIBLE

Slot racing was not invented yesterday and bearing in mind slot fans from all over the world, N-Digital stands for continuity and not a break from the norm. All cars can be digitalized, as can any set with any type of surface, and up to 10 lanes.

REVERSIBLE

Total flexibility to change from analogue to digital. The compatibility of cars and track is fully reversible, and changing from one system to another is very easy. Just by adding or removing 2 track pieces and the digital chips inside the cars.

EXTENDIBLE

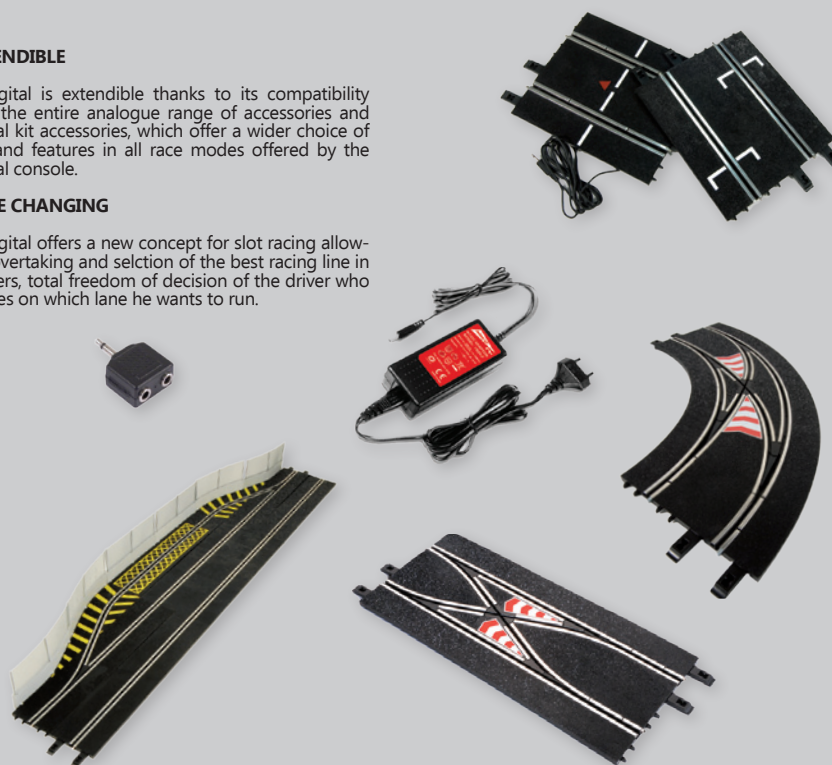

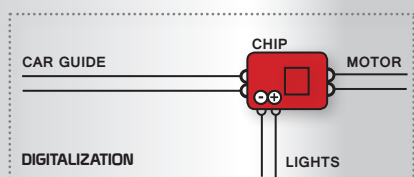

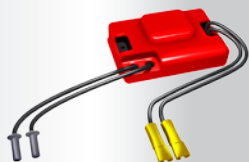

N-Digital is extendible thanks to its compatibility with the entire analogue range of accessories and digital kit accessories, which offer a wider choice of fun and features in all race modes offered by the digital console.

LANE CHANGING

N-Digital offers a new concept for slot racing allowing overtaking and selection of the best racing line in corners, total freedom of decision of the driver who chooses on which lane he wants to run.

REF 40304

CHIP DECODER
Adapts any NINCO
analogue car to
N-Digital.

KIT WIRELESS CONNECTION

WIRELESS SLOT

With the new kit WI-CO you will see SLOT from another perspective. **You are no longer tied to the controller cable!** **Goodbye tangled wires!** Move around the track freely, you no longer need help putting the car back on if you come off the track, you can now move around without releasing the controller and continue driving simultaneously.

WI-CO come with the latest 2.4 Ghz technology, a proprietary system of radio control racing, **without any interference and with excellent scope**. You can use it with any NINCO analogue track and as always, with any car of any brand. WI-CO comes with the added advantage that you can also change direction and choose from two driving levels: for beginners or experts.

NINCO4RC[®]

PROFESSIONAL

HIGH PERF

A detailed photograph of a Ninco Sioux RC car, primarily orange and black, with the number 3 on its side. The car is shown from a side profile, kicking up a cloud of dust from its large, treaded tires. It features a roll-over protection structure and two round headlights at the front. In the upper right corner, the rear portion of another RC car with red and black components is visible. The background is a plain, light-colored concrete surface.

PERFORMANCE

BOULDER

1/18

Battery & Charger 7,2V / 1.100mAh

The crawling is a booming discipline. Extreme trial to overcome any obstacle thanks to the incredible steering performance, suspension and 4x4.
