

Note: The whip light assemblies can be installed on most Traxxas vehicles using the universal mount (part #7694)*. The size and shape of some vehicle bodies and/or how the body installs on the chassis may prevent proper fitment of the whip light assembly(ies). Make sure there is adequate room underneath the body for it to install securely on the chassis with the whip light(s) installed *prior* to making any body modifications or installing the assembly(ies).

Whip Light Assembly Installation Reference Chart

*All parts sold separately.
